Summary

Fullstack Software Engineer with experience designing and developing scalable mobile applications using React Native, TypeScript, and NestJS. Built and deployed production apps from scratch, integrated backend APIs, and delivered real-world solutions in healthcare, fitness, and education domains. Focused on performance, clean architecture, and great user experience.

Technical Skills

- Languages: JavaScript, TypeScript
 - Frontend: React, Tailwind CSS, React Native
 - Backend: Node.js, Express, NestJS
 - Tools & Platforms: Git, Docker
-

Work Experience

Software Engineer | Ananas Solution

Feb 2023 – Present

CMS Platform

- Developed a **role-based CMS platform** with separate access levels for admins, doctors, and users to ensure secure and structured workflows.
- Integrated **real-time video and audio calling using WebRTC** to enable virtual consultations and communication.
- Built **web and mobile applications** to manage content and user interactions across multiple platforms.
- Implemented a **doctor booking system with time-slot scheduling**, allowing users to book appointments efficiently.
- Developed features for managing workouts, content updates, and user interactions.
- Focused on responsive UI and smooth user experience across Android and iOS.

Healthcare Recommendation Platform

- Redesigned and developed the entire React Native application using Next js TypeScript.
- Integrated REST APIs using NestJS for report processing and recommendation logic.
- Successfully deployed the app to **Google Play Store and Apple App Store**, managing build pipelines and release configurations.
- Integrated **Sentry for real-time error monitoring and crash reporting**, reducing production issues and improving app stability.

Placement Platform

- Implemented **multi-role authentication and authorization** to manage access and workflows securely.
 - Improved application **performance, scalability, and user experience** across web and mobile platforms.
 - Built **geolocation tracking features** to monitor student presence and activity during placements and training sessions.
 - Optimized app **performance and load times**, improving responsiveness and user experience across devices.
