Professional Summary

Full-Stack Developer with a Bachelor of Engineering in Computer Engineering and hands-on experience building end-to-end web applications. Proficient in React.js, Next.js, Node.js, NestJS, and TypeScript, with practical expertise in RESTful API design, JWT authentication, database modeling (MongoDB, PostgreSQL). Delivered production-grade platforms in agile team environments. Seeking a junior full-stack role to contribute to scalable, high-impact software products.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js (SSR/SSG), TanStack Start, TanStack Query, Tailwind CSS, Bootstrap, shadcn/ui

Backend: Node.js, Express.js, NestJS, REST API Design, GraphQL, WebSockets, JWT Authentication, Better Auth

Databases & ORM: MongoDB, Mongoose, PostgreSQL, Prisma ORM, Firebase Firestore

DevOps & Tools: Docker, Git, GitHub Actions, Nx Monorepo, TurboPack, Swagger/OpenAPI, Postman, Figma, VS Code

Concepts: Role-Based Access Control (RBAC), State Management, MVC Architecture, Agile/Scrum

Work Experience

Software Developer

July 2025 – Present

Muktinath Itch

Kathmandu, Nepal

- Delivered two production-grade full-stack platforms within a professional agile team environment, owning both frontend and backend responsibilities across the stack.
- Collaborated with cross-functional teams to ship features including product catalog, shopping cart, payment processing, and grievance tracking workflows.
- Integrated **Better Auth** for secure authentication and session management; configured **Nx monorepo** and **TurboPack** to optimize multi-app build pipelines.
- Diagnosed and resolved bugs in a legacy **Attendance Management System** built by a previous team, restoring accurate attendance tracking and improving system reliability.
- Currently architecting a **Token Management System** to handle token issuance, validation, and lifecycle management across internal services.
- Currently developing frontend for **B2B Marketplace** using **Nx**, **GraphQL**, and a microservices-oriented architecture to support business-to-business product discovery and transactions.
- Built reusable, accessible UI components using **shadcn/ui** and **Tailwind CSS** ensuring consistent design language across products.

Web Developer (Contract)

April 2024 – October 2024

TutorHome Nepal

Remote, Nepal

- Contracted to architect and deliver a full-stack tuition marketplace connecting 500+ parents and students with verified home tutors across Nepal.
- Implemented **Firebase Authentication**, Firestore Database, and Storage for secure user management, real-time data sync, and media uploads.
- Designed and built **role-based dashboards** (parent, tutor, admin) using **Next.js** and **Tailwind CSS**, enabling distinct permission levels per user role.
- Developed admin features: report card generation, tutor verification workflows, notice broadcasting, and analytics dashboard for tuition data management.

Company Projects

Sabal Nepal – Agricultural E-Commerce Platform (*Next.js, TypeScript, NestJS, PostgreSQL*)

sn.mitech.com.np

- Developed and maintained mostly frontend of a live e-commerce platform for agricultural products using **Next.js** with **TypeScript**, delivering a type-safe, SEO-optimized shopping experience.
- Built product catalog, shopping cart, and user authentication flows; integrated **Better Auth** for secure session management.
- Extended scope beyond the marketplace to build a company description and gallery section, dynamic Knowledge Hub, and News section with **MDX rendering** for rich, content-driven pages.

Grievance Management System (GMS) – Enterprise Complaint Portal (*TanStack Start*)

gms.mitech.com.np

- Architected and delivered a full-stack Grievance Management System for Muktinath Krishi Company using **TanStack Start** (frontend) and **NestJS** (backend) with end-to-end **TypeScript**.
- Designed RESTful APIs with **Swagger/OpenAPI** documentation and implemented **RBAC** for multi-role grievance workflows (employee, case-officer, admin).

Client Projects

TutorHome Nepal – Tuition Marketplace (*Next.js, TypeScript, Firebase, Tailwind CSS*) tutorhomenepal.com

- Built a live, production tuition platform connecting 500+ students and parents with verified home tutors across Nepal as a contracted full-stack developer.
- Implemented **Firestore Authentication**, Firestore real-time database, and Firebase Storage for secure login, live data sync, and media management.
- Designed **role-based dashboards** for parents, tutors, and admins using **Next.js** and **Tailwind CSS**, enforcing granular permission levels per user type.
- Delivered admin-side features including report card generation, tutor verification, notice broadcasting.

Academic Projects

Safar – Virtual Tourism Platform (*React.js, Node.js, Express.js, MongoDB*) GitHub

- Engineered a full-stack platform promoting Nepal's cultural heritage with multimedia content and interactive 360-degree virtual tours; won **1st Runner-Up at ETHOSHACK Hackathon**.
- Designed RESTful APIs and integrated **Google Translation API** to support multilingual immersive experiences.
- Implemented CRUD operations, secure form validation, and route protection with JWT-based authentication.

CareerLink – Internship and Job Portal (*React.js, Node.js, Express.js, MongoDB*) GitHub

- Built a full-stack job portal for IOE students featuring role-based dashboards for students, employers, and admins.
- Designed and documented RESTful APIs; implemented JWT-based authentication and authorization for secure access control.
- Modeled MongoDB schemas to support efficient querying of job listings, applications, and user profiles.

Dream Backers – Crowdfunding Platform (*React.js, Node.js, PayPal API*) GitHub

- Developed a full-stack crowdfunding application supporting campaign creation, image upload, and real-time donation tracking.
- Integrated **PayPal REST API** for secure payment processing and implemented access control to protect campaign management routes.

Personal Portfolio Website (*Next.js, Tailwind CSS*) GitHub

- Designed and deployed a portfolio at bibektimilsina.com.np with **SSR, SEO optimization**, and GitHub API integration to showcase live project data.

Education

Institute of Engineering (IOE), Paschimanchal Campus **April 2021 – April 2025**

Bachelor of Engineering in Computer Engineering *Pokhara, Nepal*

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Management Systems, Operating Systems, Computer Networks, Project Management

Canvas International College **2018 – 2020**

High School – Science with Computer Science *Kathmandu, Nepal*

Achievements

1st Runner-Up – ETHOSHACK Hackathon / *Built Safar, a virtual cultural tourism platform for Nepal* GitHub

- Competed against 8+ teams; delivered a working full-stack product in under 24 hours integrating 360-degree views and multilingual support.
- Created a virtual tourism platform highlighting Nepal's lesser-known cultural heritage.
