ABOUT

I'm a full stack developer with 1.5 years of professional experience shipping web and mobile apps. I work across the whole stack — from designing APIs and databases to building out the UI. I care about writing code that's clean, easy to maintain, and actually solves the problem at hand. I've worked with the MERN stack, TypeScript, and React Native in production.

EXPERIENCE

Full Stack Developer Aug 2024 — Jan 2026

Kree Multipurpose Pvt. Ltd · Birtamode, Nepal

- ▶ Worked on multiple client projects using the MERN stack — built REST APIs, handled database design, and shipped frontend features.
- ▶ Set up JWT-based authentication with role-based access control across several apps.
- ▶ Picked up and contributed to existing codebases quickly, fixed bugs, and improved performance in production.
- ▶ Worked directly with clients to understand requirements and turn them into working features.

PROJECTS

Property Valuation System · Next.js 15 · React 19 · Express · MongoDB · TypeScript

- ▶ Built a platform for property valuation firms and banks to manage reports, approvals, payments, and commissions — all in one place instead of spreadsheets and emails.
- ▶ Handled multi-role auth (admin, valuer, client), document uploads, and PDF report generation from scratch.

Attendance Management System · Next.js · Expo · Express · Prisma · PostgreSQL

- ▶ Built a web portal for admins/students and a separate mobile app for teachers using React Native/Expo.
- ▶ The mobile app works offline and syncs automatically — so teachers can mark attendance even without the internet.

Express Auth Vault · Express · TypeScript · Prisma · PostgreSQL · JWT

- ▶ A starter auth system I built for reuse across projects — handles JWT tokens, refresh token rotation, and token family tracking to prevent replay attacks.
- ▶ Follows a clean route → controller → service → repository pattern so it's easy to extend.

Medical Stock Management System · MERN Stack

- ▶ Inventory tracker for medical supplies with secure login, role-based access, and real-time stock updates.

SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Next.js, Tailwind CSS, Shadcn UI, Aceternity UI, Sass
Mobile	React Native, Expo, Expo Router, NativeWind, EAS Build & OTA Updates
Backend	Node.js, Express.js, REST APIs, Prisma ORM, JWT Auth
Databases	MongoDB, PostgreSQL
Tools	Git, GitHub, Docker, Linux, pgAdmin

EDUCATION

B.Sc. CSIT — Computer Science & Information Technology Nov 2022 — Present

Mechi Multiple Campus, Tribhuvan University · Bhadrapur, Nepal

Computer Engineering (Grade 11–12) Apr 2018 — Jun 2022

Saraswati Secondary School · Damak, Nepal
