SUMMARY

A dedicated fullstack developer, specializing in Next.js and Node.js, driven by a passion for exploring the limitless possibilities of modern software engineering. With a strong foundation in frontend and backend technologies, I take pride in transforming complex challenges into streamlined, elegant solutions

EDUCATION

Tribhuwan University, Orchid International College <i>Bachelor's in Computer Application</i>	Kathmandu, Nepal 2024 - Present
Mindirisers Institute of Technology <i>Mern Stack Course</i>	Kathmandu, Nepal June, 2023 - Sept, 2023

SKILLS SUMMARY

- **Languages:** TypeScript, JavaScript, Python
- **Tools:** React js, Next js, SSG , SSR, CSR, Nest Js, Express, PostgreSQL, Prisma, MongoDB, Redis, Socket IO, Tanstack Query, Axios, Zod, Gsap, Three Js , ShadCn, React Native, Expo
- **Familiar:** Git, GitHub, Jira, Linux, Docker

EXPERIENCE

Magnas Infotech Solutions <i>Software Engineer</i>	Kathmandu, Nepal November 2025 – May 2026
• Led a cross-functional team of developers in designing, developing, and deploying scalable web applications, ensuring timely delivery and high-quality standards. • Mentored frontend developers and established coding standards, resulting in improved maintainability and development efficiency. • Led database design and optimization efforts, ensuring data integrity, scalability, and efficient query performance. • Drove technical decision-making, including technology selection, architecture reviews, and best-practice adoption across development teams.	
Agile Institute <i>Mern Stack Instructor</i>	Kathmandu, Nepal December 2024 - May 2026
• Delivered comprehensive training on the MERN stack (MongoDB, Express.js, React.js, Node.js) to students and aspiring developers. • Introduced industry-standard development practices including code reviews, version control, Agile methodologies, and software architecture fundamentals. • Assisted students in preparing technical portfolios, resumes, and interview readiness for software development roles. • Provided one-on-one support and debugging assistance to help students strengthen problem-solving and programming skills.	
Rabbit Studio <i>FullStack Developer</i>	Kathmandu, Nepal November 2024 - November 2025
• Developed key modules for CRM and LMS platforms serving business and educational workflows. • Improved API response times through database query optimization and Redis-based caching strategies. • Built reusable services and shared modules within a monorepo architecture, reducing code duplication and improving maintainability. • Collaborated in Agile teams, conducted code reviews, and contributed to deployment and production support activities.	
Gen Four Tech <i>Frontend Developer</i>	Remote, Dubai May 2024 - November 2024
• Built reusable components, integrated REST APIs, and implemented scalable frontend architectures.	

- Delivered frontend solutions for international clients, contributing to the successful launch and enhancement of multiple web applications.
- Improved user experience and application responsiveness through performance optimization and modern React development practices.
- Developed reusable component systems that accelerated feature development and ensured consistent UI implementation.

Mindrisers Consortium

Mern Stack Intern

Kathmandu, Nepal
October 2023 - May 2024

- Worked extensively with Next.js Page Router, implementing dynamic routing, server-side rendering (SSR), and static site generation (SSG) techniques.
- Integrated frontend applications with backend APIs and managed data fetching for improved user experience.
- Optimized page performance, loading speed, and SEO through Next.js rendering strategies.

PROFESSIONAL PROJECTS

• [Techyversity Website + LMS](#) :

Engineered a full-featured LMS platform for an Australian education institute, enabling course management, student enrollment, and secure online payments through Stripe integration. Developed the LMS frontend using React.js, TanStack Query, and Axios, and implemented a high-performance marketing website using Next.js with Static Site Generation (SSG) for improved SEO and faster page delivery.

Technologies: React.js, Next.js, TanStack Query, Axios, Stripe, TypeScript, Express Js, MongoDB, Redis

• [RestroBloom](#):

Built a restaurant management system with real-time operational workflows, interactive dashboards, and business analytics. Implemented efficient data fetching, live updates, and data visualization using modern React ecosystem tools.

Technologies: React.js, TanStack Query, Axios, Socket.IO, Recharts, TypeScript

- **Kisan Care Mobile App:** Built a farmer assistance platform comprising a cross-platform mobile application and a web-based administration dashboard. Developed the mobile app with Expo (React Native) and the dashboard with React.js, delivering seamless user experiences across mobile and web platforms.

Technologies: Expo, React Native, React.js, TypeScript

• [Magnas Infotech Solutions Website](#):

.Designed and developed a visually immersive company website featuring advanced motion design, interactive 3D scenes, and modern web experiences. Utilized GSAP for complex animations and Three.js for real-time 3D rendering while leveraging Next.js SSG for fast loading and SEO optimization.

Technologies: Next.js, TypeScript, GSAP, Three.js, SSG

• [Stepone Crm](#):

Developed a multi-role consultancy management system designed to streamline student application and consultancy workflows. Built within a monorepo architecture using React.js, the platform supports Student, Agent, and Super Admin roles, enabling efficient application tracking, user management, and operational oversight.

Technologies: React.js, TypeScript, Monorepo Architecture

• [Mindrisers Institute of Technology Website](#) :

Developed and maintained the official website for a leading IT training institute using Next.js and the Page Router architecture. Leveraged Static Site Generation (SSG) to deliver fast-loading, SEO-friendly pages while ensuring a responsive and engaging user experience across devices.

Technologies: Next.js, React.js, TypeScript, SSG, Page Router

• [Siddha Cave Travels And Tours Website + CMS](#) :

Developed a travel and tourism platform comprising a customer-facing website, content management system (CMS), and backend services. Built the website using Next.js for performance and SEO optimization, developed the CMS in React.js for efficient content management, and implemented scalable backend APIs using Express.js, PostgreSQL, and Redis.

Technologies: Next.js, React.js, Express.js, PostgreSQL, Redis, TypeScript
