

Bishal Chaudhary

Kathmandu, Nepal — +977-9807853037 — bishalchau091@gmail.com
[LinkedIn](#) — [GitHub](#)

Professional Summary

Full-Stack Developer with hands-on experience building web applications, REST APIs, authentication systems, database-driven platforms, and backend services using Python, JavaScript/TypeScript, React, Flask, Node.js, PostgreSQL, and MySQL. Experienced in Git-based workflows, Docker containerization, API integration, debugging, and writing maintainable code. Strong interest in full-stack engineering, clean architecture, testing, and building reliable software systems.

Education

Kathmandu University – BSc. in Computer Science 2022 - 2026	Dhulikhel, Nepal
Global School of Science High School 2019 - 2021	Kathmandu, Nepal

Experience

Unicorn Games LLC – Full-Stack Developer	Jan 2026 – Present	<i>Remote, USA</i>
---	--------------------	--------------------

- Developed and maintained mobile application features in a remote collaborative environment, focusing on clean implementation, debugging, and reliable delivery.
- Worked on frontend and backend tasks involving React, JavaScript/TypeScript, REST API integration, and database-driven application logic.
- Collaborated through Git-based workflows for code updates, reviews, issue tracking, and feature improvements.
- Troubleshoot application issues, improved code quality, and contributed to maintainable production-level software features.

BrihaTech – Full-Stack Developer Intern	Oct 2025 – Dec 2026
--	---------------------

- Contributed to production-level web applications using Next.js, JavaScript, and PostgreSQL in a collaborative development environment.
- Implemented role-based authentication and authorization using JWT and Auth0 across production applications.
- Optimized PostgreSQL queries and indexing strategies, improving API response time and backend reliability.
- Containerized backend services using Docker and collaborated through Git-based development workflows.

Projects

University Attendance System with Face Recognition

- Built a FastAPI and MySQL backend for user management, attendance tracking, reporting, and role-based access for admin, teacher, and student users.
- Designed normalized database tables for users, courses, sessions, and attendance records; implemented JWT-based authentication and REST API endpoints.

AI-Based Network Intrusion Detection System

- Built a Flask backend serving machine learning predictions through REST APIs for real-time intrusion detection.
- Stored alerts, logs, and prediction history in SQLite; developed endpoints for live predictions, alert retrieval, and health checks.
- Wrote unit tests with pytest to validate API behavior, prediction handling, and backend reliability.

SQL Data Warehouse with ETL

- Designed and implemented a layered data warehouse architecture using Bronze, Silver, and Gold layers for raw, cleaned, and analytics-ready data.
- Built ETL pipelines using PostgreSQL and Python to extract, transform, clean, and load data from multiple sources for reporting and analysis.

System Monitoring Application

- Built a real-time system monitoring platform for tracking CPU, memory, disk, and network usage across connected systems.
- Developed React dashboards and integrated frontend workflows with Express.js REST APIs and gRPC-based real-time data streams.
- Supported Docker-based deployment and cloud hosting workflows on AWS, improving portability and production readiness.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++, C, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Responsive UI Development

Backend: Flask, FastAPI, Node.js, Express.js, NestJS, REST APIs, JWT Authentication, Auth0

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Database Design, Query Optimization

Testing Tools: Pytest, AWS, Git, GitHub, Docker, Postman, GitHub Actions, CI/CD, Linux

Core Strengths: Full-Stack Development, API Design, Debugging, Clean Code, Remote Collaboration

Spoken Languages: Nepali, English, Hindi

Additional Information

- Comfortable working with RESTful APIs, relational databases, Git workflows, Docker-based development, and Linux environments.
- Able to work independently or collaboratively in remote teams while communicating clearly and learning new systems quickly.
- Interested in building scalable applications, improving backend performance, and contributing to AI-focused software products.
