Professional Summary

Full Stack Developer with 1+ years of experience specializing in backend systems using Node.js, Express.js, and MongoDB. Built scalable APIs, real-time WebSocket-based systems, and integrated modern React.js UIs. Strong understanding of RBAC, validation (Zod, express-validator), and deployment using Vercel. Currently pursuing an MBA to strengthen business acumen alongside technical skills.

Professional Experience

- Gripas LLC (Gripas Marketing) — Full Stack Developer (Focused on Backend Development)

Built RESTful APIs using Node.js, Express.js, and MongoDB to power production-grade systems

- Implemented JWT-based authentication and role-based access control (RBAC) for secure access
- Engineered a real-time notification system using WebSockets, improving role-specific alerting
- Validated data inputs using express-validator and Zod for robust data integrity
- Resolved bugs and integrated UI logic using React.js, TypeScript, and Tailwind CSS
- Deployed applications via Vercel with SSL and environment-based CORS configurations
- Deployed projects with Vercel, and environment-based CORS

- CTEVT — IT Officer & IT Assistant

Managed systems for diploma and skill-based testing (Level-1 & 2) across departments

- Automated and managed test result processing and report generation
- Provided IT support for MS Office tools including Word, Excel, and PowerPoint
- Worked on government IT systems, documentation, and technical troubleshooting
- Gained exposure to government IT systems, documentation, and troubleshooting

Education

- MBA — KFA Business School, Lincoln University College

Currently pursuing

- BSc in Computer Science & Information Technology (CSIT) — Nepathya College, Tribhuvan University

Technical Skills

Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs, Multer

Frontend: React.js, TypeScript, Tailwind CSS, React Hook Form, Zod

Validation: express-validator, Zod

Real-time: WebSocket-based notification system

Tools: Git, GitHub, GitLab, Postman, VS Code, ESLint, Prettier

Deployment: Vercel, HTTPS/SSL, CORS setup

Other: RBAC, Agile, Technical Documentation, File Uploads
