SKILLS

- **Programming Languages:** Python, C, C++, Javascript, Numpy,Pandas
- **Frontend:** React, Redux, HTML, CSS, JavaScript, Tailwind CSS, Bootstrap,
- **Backend:** NodeJS, Express JS, MongoDB, Rest API, PostgreSQL
- **Deployment:** Vercel, Render, Netlify
- **Other Tools:** Git, Github, Canva ,Power BI
- **Soft Skills:** Strong communication, Leadership, Teamwork, Time Management

PROJECTS

Fake News Detection System Using the WELFake Dataset

I built a fake news detection system using the WELFake dataset and fine-tuned the RoBERTa-base transformer model for binary classification. The system processes each news article through RoBERTa's contextual embeddings and a classification layer to determine whether the content is real or fake.

With proper preprocessing and training, the model achieved high accuracy and proved effective in identifying misleading information.

Ecommerce Platform Techstacks used: React.js, Node.js, Express.js, MongoDB, Postman A robust e-commerce platform offering product listing, shopping cart, user authentication, and payment integration. Implemented full CRUD operations for products, categories, and brands with real-time form validation using React Hook Form and Yup. Integrated with secure backend APIs, enabling seamless product listing and admin control.

<https://github.com/this-is-neha/Ecommerce>

Nivaran - Complaint Register Platform Techstacks used: React.js, Node.js, Express.js, MongoDB, Mapbox

·Developed a geolocation-enabled complaint submission feature that captures user location data for accurate issue reporting. Integrated an interactive map interface allowing users to visually pinpoint and register complaints, boosting civic engagement and spatial clarity.

<https://github.com/this-is-neha/Complaint-Register-server>

Social Media Platform

Techstacks used: React.js, Redux, Node.js, Express.js, MongoDB, Postman

Integrated Redux for scalable state management, enabling efficient handling of user posts, comments, likes, and authentication across the application. Implemented real-time communication features using Socket.io, powering instant messaging, live notifications, and dynamic user interactions

<https://github.com/this-is-neha/Social>

Movie-Booking System

Techstacks used: Django, React.js, PostgreSQL, Bootstrap/Tailwind

An online movie ticket booking platform to browse movies, select showtimes, and reserve seats with a secure checkout process. It can be used for both admins and users simultaneously.

Catchup – A Cricket Portal for Nepal Techstacks used: React.js, Tailwind

CSS, JavaScript, PostgreSQL

·A Cricket Portal for Nepal offers real-time updates on cricket tournaments, match stats, and player info. Built with React and Node.js, it provides a smooth, interactive user experience

ANAIS

- Data Science
- Deep Learning

Thapathali Campus| 2022–2026

Bachelor in Computer Engineering

- ·Currently Running
- ·Full Scholarship

Prasadi Academy| 2019–2021

Higher Secondary Education

- GPA: 3.85
 - Twice Student of the month
-

EDUCATION

INTERNSHIP	Verisk Nepal Frontend Intern	
	Codeyard MERN STACK Developer	
CERTIFICATES	MERN Stack Training Broadway Infosys Pvt. Ltd. November 2023 – February 2024	React Training Girls To Code Locus 2024
CAREER GOALS	• Develop and deliver scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js. • Continuously expand knowledge in JavaScript technologies, particularly React.js, Node.js, and MongoDB. • Work in an agile team environment to contribute innovative ideas and solutions to complex development challenges. • Build user-centric applications with a focus on responsive design, intuitive interfaces, and optimal performance.	
EXTRA CURRICULAR	Leadership and Team Building Workshop As College Representative for Orbit Engineering Expo, I developed strong leadership and teamwork skills by managing event planning and coordination. I worked closely with teams to ensure smooth execution and fostered a spirit of innovation. This role greatly enhanced my confidence and organizational abilities.	
	Hackathon Participation Collaborated with a team to develop a tech solution, gaining hands-on experience in teamwork, problem-solving, and rapid development in a competitive environment.
