Profile

Full-stack software developer with hands on experience designing and delivering scalable, production grade web applications using modern JavaScript frameworks and cloud-based architectures. Strong expertise in building high performance systems, real time applications, and secure backend services with a focus on clean architecture and maintainability.

EDUCATION

Purbanchal University

Kantipur City College – Putalisadak, Kathmandu, Nepal

Bachelor of Information Technology (BIT) – *Graduated (2020-2024).*

SKILL SUMMARY

- **Languages:** JavaScript, TypeScript, Java, PHP, Python.
- **Frameworks & Libraries:** Next.js, React.js, Nest, Node.js, Spring Boot.
- **Database & ORM:** MySQL, MongoDB, Prisma ORM, Drizzle ORM.
- **Cloud & Storage:** AWS(S3).
- **Authentication:** Better Auth, JWT, Role-Based Access Control (RBAC)
- **Tools & Tech:** Git, Docker, Visual Studio Code, IntelliJ IDEA.
- **Third-Party Integrations:** 100ms, Zoom, Maps, Meta Business, Khalti, eSewa, Nodemailer.
- **DevOps & Tools:** Git, GitHub, CI/CD, Docker

CERTIFICATIONS

Project award on the Project Demo

-2024, at Kantipur City College.

EXPERIENCE

Binary Digits – Full Stack Software Developer

August 2024 – Present

- Led the development, maintenance, and deployment of scalable full-stack web applications using Next.js, React, TypeScript, NestJS, Prisma ORM, Drizzle ORM, and Strapi CMS.
- Implemented Next.js Server Actions and backend business logic, integrating Prisma and Drizzle ORM for efficient and optimized database operations.
- Configured and managed MinIO S3-compatible object storage for secure, scalable file and image uploads.
- Built and integrated NestJS and Nest backend services with RESTful APIs and JWT authentication.
- Improved system performance by optimising frontend rendering, backend logic, and database queries.
- Third party integration like 100ms, zoom, map, Better-auth for manage login, meta business,
- Collaborated with cross-functional teams to design and deploy new features.
- Optimized frontend performance, backend logic, and database queries for improved speed and scalability.
- Participated in agile sprint planning, code reviews, and CI/CD deployment workflows.

Yuwasoft Technology Pvt. Ltd., Nepal – Frontend Intern

May 2024 - August2024

- Worked on Chalau Application dashboard (frontend & admin-side web app).
- Implemented API integration and conducted API testing for smooth data fetching.
- Developed WebSocket functionality for real-time notifications.
- Integrated JWT authentication and authorization for secure access.

PROJECTS

Bike-Rental: [-](#)

A rental place for bike cycle and information about the product

- Front-end: **HTML, CSS.**
- Framework: **Spring boot.**
- Back-end: **Java, MySQL.**
- This project includes three dashboards for (user, admin, sealer).
- This project shows the product that are eligible for renting and help to book the product. The user gets production book conformation through email address.

VidyaVridhhi: [Link](#)

A project based on Student portal

- Front-end: **HTML, CSS, JS.**
- Back-end: **PHP, MySQL.**
- This project is mostly targeted to the student who want to study through home where there is expertise which upload the pdf files as well as upload the video contain of their teaching.
- Learner can communicate with the expertise if there are any queries.

Buddy's Cafe: [Link](#)

A static website of a cafe and also a review of the cafe

- Framework: **ReactJS.**
- Front-end: **HTML, CSS, JS.**
- Focus on the share of memories and some review and the detail of the cafe.
- Provide the menu of the cafe and their goals.
- Provide their details about the popular dishes they can serve.

Vehicle number plate tracker: [Link](#)

To track and monitor vehicle by tracing their number and date and time. Focus on tracking Nepali number plates.

- Framework: **Python**.
- Objection Tracking: **Yolov8**.
- Real time detection.
- For monitoring the vehicle within the organization.
- For security purpose.

Blog pages: [Link](#)

In this project I have created the blog full stack web pages.

- Framework: **ReactJS**.
- Back-end: **Nodejs, MongoDB**.
- Front-end: **HTML, CSS, JS**
- Users can share their thoughts through blog and create there one blog posts.
- User can delete the blog post.
- User can see all the blog post that have been posted.

Chalau (Company Project – Yuwasoft)

- Built **admin dashboard** and integrated real-time features.
- Worked on **frontend and backend integration** with JWT authentication and WebSocket support.
