Summary

I specialize in designing and delivering scalable software products, including white-label SaaS platforms used by high-growth clients. Passionate about building reliable, user-focused solutions that solve real-world problems

Skills

Frontend: React, Next.js, TypeScript, React Native

Backend: Node.js, Bun, Express, NestJS, Elysia.js, Go

Databases & ORMs: PostgreSQL, MongoDB, Redis, Prisma, TypeORM, SQL, NoSQL

DevOps: Docker, CI/CD Pipelines, GitHub Actions, Nginx, PM2, Linux, AWS, DigitalOcean

Experience

Software Developer

Sep 2025 – Present

Digital Pathshala (Remote/Hybrid)

- Led development of a white-label SaaS platform as the company's flagship product. Built and scaled the solution using Next.js, React Native, and Typescript, with adoption from some of Nepal's largest LMS clients.
- Developing fullstack features across frontend and backend, ensuring performance, reliability, and maintainability.

Backend Developer

May 2024 – Dec 2024

MapMentors

- Built a Learning Management System from scratch, delivering a complete product across frontend and backend.
- Worked in a CI/CD environment to ensure smooth, reliable deployments throughout the development lifecycle.
- Tech stack: TypeORM, Node.js, TypeScript, Next.js.

MERN Stack Intern

Jan 2024 – Apr 2024

Youth IT

- Gained hands-on experience in MERN stack development, contributing to real-world client projects.
- Followed industry best practices in code quality, version control, and collaborative development within a professional team.

Projects

Invisible VPN | *NestJS, Go, TypeScript, PostgreSQL, Microservices* | [GitHub](#)

2025

- Built a VPN platform using **microservices architecture** auth service in NestJS, WireGuard tunnel management in Go.
- Implemented realtime connection status and monitoring using **Socket.io** across services.
- Used **PostgreSQL** for user and session management, containerized all services with **Docker** for consistent deployment.

Learning Management System | *PostgreSQL, Node.js, TypeScript, Next.js*

May 2024 – Dec 2024

- Built a fully dynamic LMS from scratch with a **multi-role admin panel** covering courses, live classes, users, content, payments, and platform configuration fully hardcoded-free.
- Integrated **eSewa and ISP payment gateways** for real transactions, with an **affiliate system** and **e-commerce module** for course and product sales.
- Implemented a complete **assessment engine** MCQ, subjective, and quiz formats with result tracking and **automated certificate generation** upon course completion.
- Deployed both frontend and backend on **DigitalOcean** with a CI/CD pipeline ensuring stable, continuous releases.

Ride Sharing Platform | *Node.js, TypeScript, React, Socket.io, supabase*

- Developed a ride sharing web application with real-time ride matching and booking functionality.
- Built RESTful APIs for driver and passenger management with live location tracking.

Awards & Certifications

- **Winner – IICQuest 3.0 Hackathon (Itahari International College):** Secured 1st place among Nepal’s top 20+ college teams in a 36-hour hackathon. Featured in **Leapfrog Technology’s** official story.
- **Lingo.dev International Hackathon – San Francisco:** Competed globally with 1,000+ developers in a high-stakes hackathon focused on AI and localization.

Education

Bachelor of Computer Applications (BCA)
Tribhuvan University

2024 – 2028
